

Quick Notes on VISTA and XP Install

Easy three steps:

1. WITHOUT THE TOKEN / CRADLE PLUGGED IN- Run the *Policy Master.exe* that came with your CD. (your license number is 19B46E24)
2. WITHOUT THE TOKEN / CRADLE PLUGGED IN- Run the *TUSBWINVCP-single driver v.2-5.exe* (this updates the drivers that came on the Policy Master CD)
3. **NOW Plug in the Cradle!** – The Microsoft Found New Hardware Wizard will then sense the cradle and start to install the 2 drivers needed (*it will seem like its doing the same thing twice, but it really is installing two separate drivers*).
In Each Instance, the Wizard will Ask:
 - “Can Windows Connect to Windows Update to search for software?” SELECT: **NO –Not this Time** (press next)
 - When Asked by the Wizard, “What do you want the Wizard to Do?” SELECT: **Install Software Automatically(Recommended)** (press next)
